

# DENTAL

Our dental program focuses on providing safe, gentle dental treatment while consistently striving to improve the dental patient experience. Our dental clinic has 10 state-of-the-art operatories with comfortable ergonomic patient chairs, the ability to use low radiation digital x-rays, a full imaging room that can take external ultra-low dose radiation digital images with 3D capabilities for advanced treatment planning, and we use hospital-grade sterilization equipment. Our goal is to make your dental care as comprehensive and comfortable as possible by providing an excellent patient care experience, using state-of-the-art tools and equipment, and through on-going continuing educational courses for our dental staff.
